\$1,000,000 Incentive Pool funds will be distributed to qualified nonprofits proportionally based on final online fundraising totals, not to exceed the maximum payout per organization outlined below. Each qualifying organization's portion of the Incentive Pool is determined as follows: $[\text{total eligible online donations for the organization}] \div [\text{total eligible online donations to all qualifying organizations}] \times \$1,000,000 = \text{payout amount}$. For instance, if the organization raised 1% of the total eligible online donations for all qualifying organizations, they would receive 1% of the Incentive Pool.
